

District Approved Software

Procedures for adding software to this list:

1. Research the software you are looking for.
2. Obtain a demo copy from the vendor. (If a demo is not available then the software cannot be used. Compatibility testing is needed before purchase).
3. Give the demo to your technician for testing.
4. Technology department will test the software for compatibility with district network and workstation configuration.
5. If the software checks out, it will be added to the approved list.

Current approved software. 10/3/2005

*Available from OETC
