

Allen McReynolds

Diversified Livestock Production

I am a senior and love to work with animals and to be outside doing work. I am your average student; this will be my 3rd year in FFA. I was the chapter sentinel my 1st year and vice president the other two years.

My project is diversified livestock. That means I raise more than one species of animal. In my case I raise Brahman cattle and swine and show them at the Clackamas county fair. I raise swine for market and that is how I pay off my cattle.

I have learned a lot from my project. For example, money doesn't grow on trees and it's not as easy to be a farmer in the modern day as people say it is. Manual labor is hard but it pays off. I have also learned how to work with other people.
