

Greenhouse Project Update

November, 2008

- This summer, a team of volunteers hauled our new greenhouse from Hood River to Estacada. Thanks to Dean Schoknecht for helping to coordinate this great feat!
- So far, the building construction classes have established the foundation area for the greenhouse and have erected a security fence for the facility.
- Special thanks to all those community members who have helped with these first steps, including Holm Bros. Construction and Estacada Rock.
- Weather pending, we hope to start construction of the structure within the next couple of months. Check back here for more updates!

The progress so far.....

Our ultimate goal.....
